CCAIRNS ASSOC.
MEDIA CONSULTANTS

CCairns Associates create high-quality media for the medical professional and accompanying industries. As a well established UK based company, they specialise in analytical models, 3D visualisations and instructive media.

3D Model development

CCairns Associates develop models with the flexibility of use in a wide range of media. They can be used for software analysis, animations, stills and instructive courses or visualisations. Using a created model, the client can choose the camera shots, lighting, level of detail and colour, all within realistic time and financial boundaries.

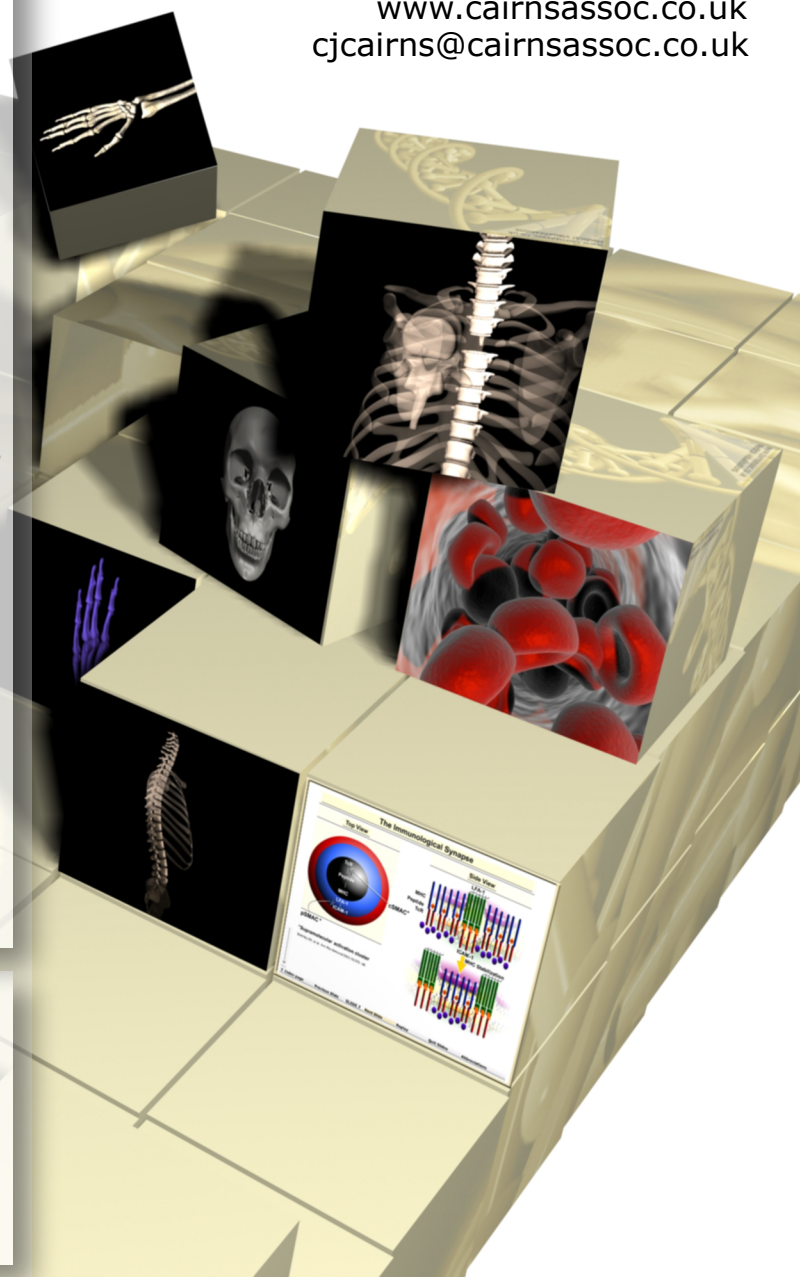

Media

Projects can include full course media with the option of unique players, including tools and interaction, with 3D photo realistic animations or 2D graphics applied.

What CCairns Associates offer is a full solution for the dissemination of the client's information. Prepared for web, CD-ROM, publication or instructional course, our goal is to achieve the best results for the client in the most cost effective way.

As part of a consortium of experienced consultants, we pride ourselves on supplying one consultant per project. Contact is maintained by one consultant giving the client the opportunity to control every aspect of the project.

3D MODELS
